

## FBAR COMPLIANCE IS A BINARY FUNCTION

FBAR compliance is binary. You either are complaint and in good shape or you aren't, and that puts many important demands on your Treasury team's time. Regulatory requirements dissipate the time available with no added value to your team or to management. Companies not only have to file their corporate FBAR, but must also track and report on U.S. individuals and resident aliens with signing authority but no financial interest in the accounts. This regulatory process inundates you with piles of paperwork, updating signer databases, tracking maximum balances per account, and countless follow ups.

Strategic Treasurer's Compliance Team can take on the burden of FBAR, freeing you up for high-level activities and decisions, while keeping you up-to-date and compliant.

Filing requirements, formats and processes change. Strategic Treasurer manages these for you.

PILES OF DATA

We provide relief from the overwhelming workloads through our FBAR Services.

Outsource the headache of FBAR and remain compliant.

Let us keep up on current regulatory requirements for you.

Focus your time and energy on the important business of treasury.
